External links Albi - Droit (French law firm website) Albi - Délégué général (French law firm website) Category:City of Luxembourg Category:Legal abbreviation Category:French-language surnames Category:Luxembourgian culture

Polymorphisms in the 7-repeat Glycine gene in CAG repeats and type 1 diabetes mellitus. The 7-repeat Glycine allele is associated with disease susceptibility in a number of autoimmune diseases, including multiple sclerosis, juvenile rheumatoid arthritis, and type 1 diabetes mellitus (T1DM). In T1DM, seven G7 alleles have been shown to be overrepresented among patients of African origin compared with controls. A second G7 allele is associated with adult-onset diabetes mellitus. A third G7 allele, observed in T1DM patients of Asian origin, is associated with protection against disease in this population. We investigated the frequency of the 7-repeat Glycine allele in a large Irish population of T1DM patients. The allele frequency of the 7-repeat Glycine allele was similar in the population as a whole (0.006) and in Caucasian T

System Requirements For MxEclipse:
