## NovoSPT (SPT Correlation Program) [Win/Mac] (2022)

# Download

## NovoSPT (SPT Correlation Program) Crack + Full Product Key

NovoSPT (SPT Correlation Program) is an innovative, user-friendly software developed by Dr. Sabin Saribunya, Department of Geotechnics, Faculty of Engineering, University of Peradeniya, Sri Lanka. NovoSPT (SPT Correlation Program) is a useful application used for interpretation of Standard Penetration Test (SPT/DCPT) and correlating blow counts to soil properties. NovoSPT (SPT Correlation Program) is based on more than 100 equations and methods extracted from 30 geotechnical books and papers. All charts can be separately printed, saved as text file, MS Excel file and even exported to graphic formats like JPG, BMP, TIFF, etc. Since bearing capacity and settlement of shallow foundation and piles are also incorporated into this program, user may enter as many SPT numbers in depth as necessary. NovoSPT (SPT Correlation Program) will calculate the average  $N_{60}$  below the foundation according to this data. Totally more than 100 formulae and methods are implemented from 30 papers and reference books. One of the features of NovoSPT (SPT Correlation Program) is plotting all the results and correlated values for a specific soil parameter in one graph to facilitate comparison and choice of the best estimated value for that parameter. The

---

powerful report builder in NovoSPT (SPT Correlation Program) summarizes all correlated results in a good-looking, printable report in form of tables and graphs. See the complete list of correlated soil parameters based on Standard Penetration Test (SPT) in NovoSPT (SPT Correlation Program). The new innovative "Cross Correlation with Depth" feature enables user to plot the variation of a specific soil parameter along depth of borehole, correlated based on some correlation methods to ease comparison of correlated values in depth. Please check our website to download a free trial version of our software. QR Code NovoSPT (SPT Correlation Program) is an innovative, user-friendly software developed by Dr. Sibin Saribunya, Department of Geotechnics, Faculty of Engineering, University of Peradeniya, Sri Lanka. NovoSPT (SPT Correlation Program) is a useful application used for interpretation of Standard Penetration Test (SPT/DCPT) and correlating blow counts to soil properties.

NovoSPT (SPT Correlation Program)

## **NovoSPT (SPT Correlation Program) Crack Torrent For Windows**

Correlating SPT Depth and Depth 0 N60 Values to Soil Parameters: NovoSPT (SPT Correlation Program) For Windows 10 Crack is a simple but powerful application for correlation of SPT depths and N60 depth values to soil properties. It can calculate correlation values for any number of soil properties. NovoSPT (SPT Correlation Program) can be a very convenient tool for monitoring the performance of the drilled boreholes. The options for each tested parameter in depth correlation are shown in the standard form of the test chart. Any change of the depth chart will reflect in a new chart. NovoSPT (SPT Correlation Program) provides the following features:

- Single as well as multi-parameter correlation to the depth of a specific borehole,
- Variable number of parameters in depth correlation chart,
- The option of switching to depths 0 and 60 and N60 depths,
- Change depth chart at run time,
- Graphic plot of all correlated results in one graph,
- The summary report builder,
- A user friendly interface and beautiful report design,
- Use of API 10,
- Save & load charts to files for the future use,
- Ability to make a printable version of a chart,
- Several tabs for convenient navigation and quick correlation of parameters in depth chart,
- Report builder and print stylesheet,
- A choice of printing the chart in landscape or portrait orientation,
- Graphical and numerical values of the plotted parameters at depths 0 and 60 and N60 values,
- Automatic calculation of the average N60 values of a specific depth in several depths of borehole and plotted as a graph,
- Cross correlation of SPT depths and N60 depths with depth of borehole,
- Reports from NovoSPT (SPT Correlation Program) can be exported as Microsoft Word or Excel files.

Use of API10: NovoSPT (SPT Correlation Program) has the additional advantage that NovoSPT (SPT Correlation Program) can be used via API 10 interface. API 10 provides access to all data entered from the interface and the main algorithm of NovoSPT (SPT Correlation Program) as well as the reportbuilder. NovoSPT (SPT Correlation Program) is available in English and Arabic languages. NovoSPT (SPT Correlation Program) is a powerful application for correlating data.

## **NovoSPT (SPT Correlation Program)**

NovoSPT (SPT Correlation Program) is a useful application used for interpretation of Standard Penetration Test (SPT/ DCPT) and correlating blow counts to soil properties. NovoSPT (SPT Correlation Program) is based on more than 100 equations and methods extracted from 30 geotechnical books and papers. All charts can be separately printed, saved as text file, MS Excel file and even exported to graphic formats like JPG, BMP, TIFF, etc. Since bearing capacity and settlement of shallow foundation and piles are also incorporated into this program, user may enter as many SPT numbers in depth as necessary. NovoSPT (SPT Correlation Program) will calculate the average N60 below the foundation according to this data. Totally more than 100 formulae and methods are implemented from 30 papers and reference books. One of the features of NovoSPT (SPT Correlation Program) is plotting all the results and correlated values for a specific soil parameter in one graph to facilitate comparison and choice of the best estimated value for that parameter. The powerful report builder in NovoSPT (SPT Correlation Program) summarizes all correlated results in a good-looking, printable report in form of tables and graphs. ... Cost Effective Testing Solution for Penetration & Compaction Testing This is a FREE download from the site. It is a powerful tool that will help you get the most out of your soils testing in the most cost effective way. Advanced Testing Software for Cylinder Testing This is a FREE download from the site. It has the ability to analyze an entire cylinder test setup and give you detailed information on how soil conditions affect the results. Advanced Testing Software for Density Determination This is a FREE download from the site. It is a powerful tool that can analyze an entire density determination test setup and give you detailed information on how soil conditions affect the results. Cylinder Testing Software This is a FREE download from the site. It has the ability to analyze a single cylinder test setup and give you detailed information on how soil conditions affect the results. Advanced Testing Software for Density Determination This is a FREE download from the site. It can analyze an entire density determination test setup and give you detailed information on how soil conditions affect the results. LabVIEW - Real Time Monitoring & Control Program LabVIEW is a real-time programmable, high-performance, mixed-sign

## **What's New in the NovoSPT (SPT Correlation Program)?**

NovoSPT (SPT Correlation Program) is a useful application used for interpretation of Standard Penetration Test (SPT/ DCPT) and correlating blow counts to soil properties. NovoSPT (SPT Correlation Program) is based on more than 100 equations and methods extracted from 30 geotechnical books and papers. All charts can be separately printed, saved as text file, MS Excel file and even exported to graphic formats like JPG, BMP, TIFF, etc. Since bearing capacity and settlement of shallow foundation and piles are also incorporated into this program, user may enter as many SPT numbers in depth as necessary. NovoSPT (SPT Correlation Program) will calculate the average N60 below the foundation according to this data. Totally more than 100 formulae and methods are implemented from 30 papers and reference books. One of the features of NovoSPT (SPT Correlation Program) is plotting all the results and correlated values for a specific soil parameter in one graph to facilitate comparison and choice of the best estimated value for that parameter. The powerful report builder in NovoSPT (SPT Correlation Program) summarizes all correlated results in a good-looking, printable report in form of tables and graphs. See the complete list of correlated soil parameters based on Standard Penetration Test (SPT) in NovoSPT (SPT Correlation Program). The new innovative "Cross Correlation with Depth" feature enables user to plot the variation of a specific soil parameter along depth of borehole, correlated based on some correlation methods to ease comparison of correlated values in depth. NovoSPT (SPT Correlation Program) Statistics: NovoSPT (SPT Correlation Program) has a typical size of 1,7 MB. The program has been tested for stability and the installer file is downloaded without problems. NovoSPT (SPT Correlation Program) Review: NovoSPT (SPT Correlation Program) is a very useful and powerful geotechnical calculation and reporting program for all types of foundation and pile specifications. With NovoSPT (SPT Correlation Program) you can calculate and plot all soil parameters based on SPT Test results and adjust the foundation based on the following common correlations. NovoSPT (SPT Correlation Program) can be run from command line. All the calculations are done on the fly and therefore can be executed with any desired depth. NovoSPT (SPT Correlation Program) Requirements: NovoSPT (SPT Correlation Program) has been checked for compatibility with Windows 8, Windows 7, Windows 10, Windows Vista and Windows XP. NovoSPT (SPT Correlation Program) Version: NovoSPT (SPT Correlation Program) has been tested with
