Q: Apply.html() on dynamically created input I have a problem that I cannot seem to figure out how to solve. I'm dynamically creating a section of the page using the following code:

```
$(document).on("click", "#addtaskbutton", function () { var newSection = $("", { "class": "todo_container" });

$section =
$("section.todo_container").last();
$section.after(newSection);

Q: Open Sets and Uniform Spaces I have a question about open sets in a metric space. I think I understand the basics but my understanding is weak.

Consider $X = [0,1]$ and $d(x,y) = |x - y|$. Let (X,d) be the uniform space. We have $[0,1/2)$ which is an open subset of X . Yet, it does not lie in $[0,1]$.
