The internal storage of the camera has been removed at repair. When I got the camera back, I was now be able to use the memory card that had been fitted into the camera by default, as it was in "micro SD" format.

Isn't the memory card supposed to be 1 GB or more in capacity?

The memory card is 9.8GB, from the manga prompt!

Please don't ask me to explain the information above, I'm not a tech guy. If you want a more detailed explanation just visit the memory card wiki page.
